Measuer - Control - Evaluate

MessMAX® with Hard- and Software

Burat & Klein Datentechnik GmbH

Measuring amplifier modules

For sensors and dynamic quantities such as:

For sensors and dynamic quantities such as:
Pressure, force, displacement, angle, current, voltage, speed, torque, flow, temperature, vibration, ...

MultiMessBox USB 16 channel

Electrical power meters

„Zimmer" (LMG 95 / 450 / 500) oder
„Yokogawa" (WT300, 333, WT1800, WT3000)

Interface: USB, serial or ethernet

MiniMessBOX

Thermo CAN: Thermocouples / KTY / PT100.... „DMS-CAN": Force, path, strain...
„U-CAN": +/- 10V
„I-CAN": 0/4...20 mA

CANbus-USB adapter
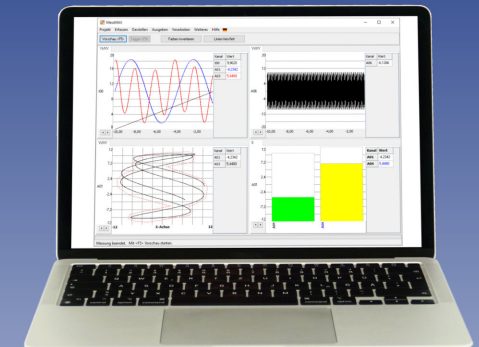

Automotive - CAN

SteuerBOX (ControlBOX)
With programmable analog outputs for setpoint setting or actuator control

CANbus-USB adapter

MessMAX®

The software for measurement data acquisition and evaluation ...

... as well as for control of actuators
